- A family of six drove over 240 km in a car at an average speed of 100 km/hr. The trip took 2.4 hours. When they unpacked their luggage they realised that the car had a flat tyre during the whole journey. Why had they not noticed this before?
 - After a long and arduous journey your ship reaches the sea which is your destination. However, there is no water to be seen anywhere. In fact there never was any water and you knew that perfectly well before you set out. So why did you navigate your ship to this sea ?
 - Larry Lightlot always complains that if only people told the truth he would sell more of his goods. What does he make ?
- Isabelle Ringnoud decided to visit the monastery at New Norcia where she loved to hear the large church bells being rung. Isabelle noticed that it takes exactly 25 seconds for the bells to ring out 5 o'clock. Given these facts, how long will it take to ring the bells at 10 o'clock?
- Place the digits from 1 to 9 into the following diagram so as the four equations are correct.

$$\begin{array}{ccccccc} \square & - & \square & = & \square & & \\ & & & & & \times & \\ \square & \div & \square & = & \square & & \\ & & & & & \parallel & \\ \square & + & \square & = & \square & & \end{array}$$
