2. Travelling on a Perth north bound train we have three passengers with the surnames Parabolic, Hyperbolic and Notmuchlogic. By coincidence the train driver, the security guard and the ticket conductor have the same surname.

1. The three passengers and the three members of the crew all live somewhere between Stirling and Warwick.
2. Passenger Parabolic lives in Stirling.
3. The security guard lives halfway between Stirling and Warwick.
4. The passenger with the same surname as the security guard lives in Warwick.
5. The passenger who lives nearest the security guard earns exactly three times as much per fortnight as the security guard.
6. Passenger Hyperbolic earns exactly \$1207 a fortnight.
7. Notmuchlogic (one of the crew) recently beat the ticket conductor at miniature golf.

What is the train drivers last name ?

3. First try and solve the 3×3 magic square by inserting the digits from 1 to 9 so that each row, column and corner-to-corner diagonal sums to 15. Then see if you can solve the 4×4 magic square by inserting the digits from 1 to 16 so that each row, column and corner-to-corner diagonal sums to 34. Some of the digits have been included to help you.
