1. Study the sequence below and then complete the ninth square.

2. Can you unravel the reasoning behind these domino pieces and find the missing letter ?

3. “How many girls are there?” said Martha’s mother.

“I do not know,” said Gertrude’s mother, “but every two used a dish for fairy bread between them, every three used a dish for potato chips between them and every four used a dish for frankfurters between them.”

There were 65 dishes in all. How many girls were there at Gertrude’s party ?
